🎓 EDUCATION

Associate's Degree in Information Technology (IT)   Iran , Arak
Arak University
Information Technology 3.7 / 4.0

Bachelor's Degree in Software Engineering   Iran, Arak
Arak University

🗄 PROFESSIONAL EXPERIENCE

backend developer   Tehran
webnegar Company

Self-Employed   remote
Freelance Developer
More than 5 years of remote experience collaborating with distributed and freelance teams, focusing on web application development.

Backend developer   Arak
sitedar Company

📂 PROJECTS

iranmarket.ir
Developed and deployed an e-commerce platform using Django with secure Zarrinpal payment integration. Implemented shopping cart, user management, and order modules. Built responsive UI with HTML, CSS, Bootstrap, Ajax, and jQuery. Used PostgreSQL, JWT authentication, and optimized live deployment.

cosmeticqueen.ir
Developed and maintained CosmeticQueen.ir, an online cosmetics store built with Django. Implemented product management, shopping cart, and secure payment system. Designed a responsive, user-friendly interface using HTML, CSS, Bootstrap, and jQuery. Handled database management with PostgreSQL and live server deployment.

aratwood.ir
Development of a store website for a furniture manufacturer, using Django. Design and implementation of the complete store panel, including user registration, shopping cart, user profile and orders

🧠 SKILLS

Backend:
Django,
Django REST Framework (DRF),
Python, PHP, WordPress, REST API Design,

Frontend:
React.js,
JavaScript (ES6+), HTML5, CSS3, Bootstrap, jQuery, Ajax, Responsive Web Design

DevOps / Deployment:
Docker, Nginx, Gunicorn, Git, GitHub, CI/CD, Linux Server Management

Other Tools & Workflow:
VS Code, Postman, Trello, Agile / Scrum, Dark Mode UI Design, Performance Optimization, Debugging

🎻 INTERESTS

Professional Interests — Open-source development and contributing on GitHub • Web performance optimization and scalability • Modern UI/UX design and dark mode interfaces • Exploring new backend technologies (FastAPI, Node.js) • Continuous learning through online courses (Udemy, Coursera) • API architecture and system design
